Who We Are

Heartland Precision Fasteners, Inc., is a world class manufacturer of high strength, tight tolerance aerospace fasteners located outside of Kansas City. Founded in 1994, our focus has been on best-in-industry quality and delivery. Our consistent performance has awarded us the following recognition:

Boeing Company - Silver Supplier

Lockheed – 100% Quality & Delivery 2013

Northrop – Platinum Supplier

Lycoming Engines – Premiere Supplier

Wesco Aircraft – Star Supplier

Our Delivery

At Heartland, we are aware that poor quality is not the only issue that costs our customers money. Long lead times, A.O.G.'s, downtime, and line stoppages are every bit as important and costly as quality issues. By remaining flexible, Heartland sustains on-time delivery rates in excess of 97% while maintaining better than industry average lead times. Expedited orders are also available in as little as 1 week.

Our Quality

Heartland is an ISO9001 and AS9100 Certified company as well as NADCAP certified.

Our focus on quality has allowed us to maintain customer returns of less than ½% of sales.

Our Capabilities

Heartland can cold head and thread roll fasteners up to ½" diameter by 5.00" long. Materials include 8740 Alloy, A286 stainless steel, PH13-8MO, Inconel, and Titanium. We also possess in-house CNC lathes and mills, vacuum heat treat and finishing that allow us to manufacture machined parts and expedite orders. Reverse engineering is also available.
